Removing and Disinfecting a Plastic Face Shield

1. Wash hands thoroughly.
2. Grasp face shield by the straps near the temples, look downward, and pull the shield from your face.
3. Spray all surfaces of the face shield liberally with a solution containing bleach.
4. Allow the face shield to remain wet with bleach solution for 1 minute.
5. Rinse all surfaces of the face shield with water for at least 1 minute.
6. Dry the face shield with a paper towel or allow face shield to air dry.
7. Clean work area.
8. Remove gloves and wash hands thoroughly.
